Professional Profile

A highly driven and innovative undergraduate in Software Engineering at the University of Plymouth (UK), graduating in 2025, with a proven track record in designing, developing, and deploying scalable, production-grade software projects. Adept in modern web and mobile technologies, including React, Angular, Node.js, Three.js, Flutter, and Firebase, as well as robust backend systems leveraging TypeScript, Java, Express.js, MongoDB, and SQL. Demonstrates expertise in cloud-native development, containerization, and deployment best practices on platforms such as AWS and Google Cloud.

Education & Learning

BSc (Hons) in Software Engineering
Plymouth University, UK
2022 - 2025

IT Foundation Program
NSBM University, Sri lanka
2020 – 2021

G.C.E Ordinary Levels Examinations
Royal Institute International School
2015 - 2019

SQL Bootcamp with MySQL, PHP & Python
Udemy

Master Classes for Web Designing Course
Udemy

Skills

Visual Studio Code
Google Cloud console
GitHub
Android Studio
GitHub Action
AI-related tools
GCP & AWS
Figma & Adobe Software's
Agile & Scrum
Jira, Slack, Notion
Docker
Fluent in English, Sinhala

PHP
Java
Flutter
React
Angular
Node.js
Express.js
SQL
Firebase
Mongodb
JavaScript
Typescript

Experience

NSBM University - Associate Software Engineer (2025 - Present)

- Worked on various internal university management systems including AI integrations on University tools and Developments on Public Mobile apps and more.

Infigo Developers - Start-Up (2020 - 2022)

- Worked with various clients, to meet their specific requirements on the Web Development Needs.
- Gained hands-on experience in WordPress Web Development and knowledge about Frontend Frameworks like React and Angular.

Iplay Gobal - UI Developer Intern (2022 - 2023)

- Gained hands-on experience in front-end development technologies, including HTML, CSS, JavaScript, and UI frameworks.

Highlighted Projects

Roometry3D – Immersive 3D Interior Design Platform (React, Three.js, Firebase, Node.js)

- An advanced web application which enables designers, clients, and furniture specialists to visualize and edit interior spaces in real-time 3D.
- Interactive 3D Visualization powered by React Three Fiber and Three.js, delivering photorealistic lighting and immersive controls.

FIRST MINERAL TITLE – Texas Leon County Deed Search System (Angular, TypeScript, Java, Docker) by Title Data Design

- A robust web application built to handle the indexing, search, and management of over 1.8 million official deed records for Leon County, Texas.
- Features a powerful, intuitive search system with smart filters, real-time result previews, and seamless navigation across a vast property records database.

Doc-Assist Pro – Modern Healthcare Assistant Solution (React Native, Angular, Node.js, Docker)

- A comprehensive, full-stack healthcare management platform featuring React Native mobile apps for patients and doctors, an Angular admin portal, orchestrated with Docker.
- AI-powered doctor recommendation system and smart scheduling to enhance patient care and streamline appointment management.

LiteraNet - Smart Library Management System (MEAN Stack)

- A comprehensive full-stack web app developed using MEAN Stack, featuring a robust architecture and modern design principles to enhance user experience and functionality.
- Docker integration for streamlined deployment and scalability.
